Towing and Recovery Service Partnerships

**Working *Faster* as a Team:
Increase Safety
And Get Traffic Moving Again**

TRSP's help public and private partners establish protocols, clearance time targets, and often training and incentives, to ensure that the right responders, tow equipment and operators are on the scene quickly to safely restore traffic flow after an incident.

Why A Towing and Recovery Services Partnership?

Why now?

TRSPs are already at work in several states. Each partnership means motorists and responders are safer and the likelihood of secondary accidents is reduced, increasing safety and mobility for all. TRSPs are customizable to the needs, laws, and practices of each region or agency.

TRSPs work because they were developed, tested and successfully adopted by your peers. The AASHTO Technology Implementation Group assembled those innovators on a team that is standing by now to help you deliver TRSP to your customers.
