

Under “System Performance”

*** System Option**

As a system option, the SMARTZONE Contractor may provide two (2) cameras (1 for each direction of I-95 or 2 in the same direction if work is only occurring in 1 direction of I-95) to provide live video feed of the workzone. If used, these cameras shall become activated when delay in the workzone is detected by the speed sensors. Otherwise, they are to remain "off" unless activation is requested by authorized personnel.

This activation will be an "On Demand" feature the Department can use to verify traffic conditions and/or verify messages on the Changeable Message Boards as well as other incident management purposes.

This "On Demand" feature shall be accessible from the project website with by providing a password protected “link” for approved personnel. If used, the cameras shall be mounted on a portable trailers located near the lane closure (See attached drawings) and shall have PTZ capabilities.

As this is an optional item, there will be an optional pay item for this feature that the SMARTZONE Contractor will be allowed to price on a monthly basis. This monthly price is for BOTH of the cameras, not for each. However, the camera option WILL NOT play a role in determining the low bidder. The low bidder will be determined by the required pay items for this contract. Once awarded, if funding allows and the low bidder would like to utilize this optional item, then the Department will use the provided monthly price quoted at the time of bidding to negotiate the duration of these devices with the SMARTZONE Contractor.
