

Plans on Demand

Low or no cost options that improve access to ROW plans, maps and other documents for agencies and their customers.

Why Plans on Demand? Why now?

Plans on Demand offers two user-friendly options that provide convenient access to existing right of way plans, maps, and other documentation.

PDF Index	GIS Index
Quick click access to decades of plans	Quick click access to decades of plans
No or low cost to create	Low cost to create
User-friendly PDF format	Interactive geospatial format
Less demand on staff	Less demand on staff
Plans linked by milepost using an aerial map	Georeferenced plans plus relevant data layers

Plans on Demand works because it was developed, tested and successfully adopted by your peers. The AASHTO Innovation Initiative assembled those innovators on a team that is standing by now to help you deliver Plans on Demand to your customers.
